acts-as-taggable (gem)

September 2014

- Contributed feature that allows users to display a chosen number (default 50) of most/least used tags.

Diaspora*

August - September 2014

- Contributed to installation instructions for Mac OS X 10.8 or higher.
- Contributed feature that allows users to auto add a poll answer when creating a poll.
- Contributed feature that displays services (facebook, twitter, etc.) in statistics.json.
- Implemented line breaks in headings that were too long to display.
- Created feature to display 50 most used tags in statistics.json but the feature was not merged due to disagreements on whether to have it or not by the larger Diaspora* community.
